

From Student to Full Stack AI Engineer

12 Weeks | 96 Hours | Sat & Sun | Cohort 14

[Frontend Developer](#) | [Full Stack Developer](#) | [AI Application Developer](#)

[About NimbleX](#)

Who We Are

NimbleX is an industry-oriented engineering academy that combines expert mentorship, real-world projects, and dedicated progress tracking. We help learners become confident, job-ready Software Engineers through structured, project-based learning and continuous guidance from Architects and Reporting Managers.

We don't just teach syntax — we build engineers. Every student works on real projects, gets assigned a dedicated Reporting Manager, learns from senior Architect-Mentors, and follows a structured journey that mirrors how modern software teams actually work.

Our Pillars

Mentor-Led

Every student gets a dedicated Architect

Project-Based

Real builds every week

Accountability

Reporting Manager tracks your progress

Career-Focused

Industry workflows & job-ready skills

Program Overview

Everything You Need to Know

12 Weeks

Total curriculum duration

96 Hours

4 hrs × 2 days × 12 weeks

Sat & Sun

Weekend-only schedule

4 hrs/day

Morning or evening batches

Roles You Can Land

After completing this program, students are equipped to apply for:

- [Frontend](#) Developer (React · TypeScript · Tailwind CSS)
- [Full Stack](#) Developer (React + FastAPI + PostgreSQL)
- [Python Backend](#) Developer (FastAPI · SQLAlchemy · REST APIs)
- [AI Application](#) Developer (OpenAI · LangChain · RAG · Agents)

Why This Matters

The Full Stack AI Opportunity

82%

of new software roles require full-stack + AI skills (2025)

3.5M+

global shortage of AI-capable developers

₹18–35 LPA

average CTC for Full Stack AI developers in India

12 Weeks

is all it takes with the right structure

What Makes This Different

Self-Learning approach

Scattered learning resources
Practice without real projects
No support when stuck

NimbleX Journey

Structured engineering roadmap
Dedicated Reporting Manager
Git, reviews, deployment workflow

13 Steps. One Complete Engineer.

Each step builds on the last. You always know why you're learning what you're learning.

- | | |
|----|--|
| 01 | Frontend Foundations |
| 02 | HTML — Structure & Semantics |
| 03 | CSS — Styling, Flexbox & Responsive Design |
| 04 | JavaScript — Interactivity & DOM |
| 05 | Python — Programming Language |
| 06 | TypeScript — Type Safety |
| 07 | React.js — Component-Based UI |
| 08 | Backend — FastAPI |
| 09 | Database — PostgreSQL + SQLAlchemy |
| 10 | AI & GenAI — LLMs & Prompt Engineering |
| 11 | RAG — Retrieval-Augmented Generation |
| 12 | Agentic AI — AI Agents & Memory |
| 13 | Capstone — Final Full Stack AI Project |

Week-by-Week Breakdown

Week	Topic	Key Subjects
W1	HTML & CSS Foundations	HTML5, Semantic Elements, Forms, CSS, Flexbox, Responsive Design
W2	JavaScript Fundamentals	Variables, Loops, Functions, DOM, ES6, Fetch API, Async/Await
W3	Python Programming	Syntax, OOP, Modules, File Handling, Exceptions, Collections
W4	TypeScript	Static Types, Interfaces, Type Aliases, Unions, Generics
W5	React Fundamentals	Components, JSX, Props, State, useState, useEffect, Router
W6	Advanced React	Forms, API Integration, Custom Hooks, Context API, Performance
W7	Backend — FastAPI	REST Design, Routing, CRUD, Validation, JWT, Middleware
W8	Database — PostgreSQL	SQL, ERD, Normalization, Joins, SQLAlchemy ORM, Relations
W9	Full Stack Integration	React + FastAPI, Axios, Auth Flow, Protected Routes, Deploy
W10	AI Fundamentals	LLMs, Tokens, Prompt Engineering, OpenAI API, Gemini, Claude
W11	RAG & Agentic AI	LangChain, Embeddings, FAISS, ChromaDB, Agents, Memory
W12	Capstone Project	React + TypeScript + FastAPI + PostgreSQL + OpenAI + RAG + Agents

Note: Classes will be conducted only on weekends. However, daily tasks will be assigned, and the RM will monitor progress every day. Additionally, one problem-solving question will be given daily to ensure continuous learning and practice.

Before & After NimbleX

Before

"I learned separate tools but don't know how they connect."

After 12 Weeks

"I built a full stack AI SaaS app using React, FastAPI, PostgreSQL, OpenAI, LangChain, RAG & Agents."

Resume-Ready Skills

Frontend

HTML · CSS · JS · TS · React

Backend & DB

Python · FastAPI · PostgreSQL

AI Layer

OpenAI · LangChain · RAG · Agents

How to Enrol

Your Journey Starts Here

- 1 Visit nimblex.dev
- 2 Click "Become an Engineer" and fill in the enrollment form
- 3 Our team will reach out to confirm your batch and seat
- 4 Complete onboarding — get your schedule, tools, and access
- 5 Show up on Day 1 and start building

Limited Seats — Starts August

Seats fill fast. Secure your spot before enrollment closes.

We can't wait to build without you.
